1		VIBRASENSE - Diabetic Foot Neuropathy Screening Device	AD001	VIBRASENSE: It is a quick screening tool that quantifies the severity of foot neuropathy. The device is CE approved, portable, hand-held, battery-powered, and can screen up to 100+ patients with a single charge. It has an onboard display to show the severity on the go. It connects wirelessly with the application for generating reports and monitoring. The USP of the product is to analyze the patients based on their history. The algorithm classifies the patient into the low-mid-high-risk category.	42500
